

Material-Free Statement

Weaver and Company takes great pride in the quality of raw materials used to manufacture our medical devices, Ten20[®] Conductive Paste and Nuprep[®] Gel. Our goal is putting the health and safety of you, our customers, first. With this goal in mind, please see the following list of raw materials and by-products which are **NOT** used in our products:

- Latex
- Gluten
- Peanut
- Dairy or Egg
- Animal by-products
- Human Cells or Tissue
- Shellfish or Fish by-products

Though this list is not intended to be an extensive list of ALL ingredients that cause concern, these are the most common material questions our customers ask. A complete list of materials, or further details, can be found in the MSDS or Instruction Sheet for each product.
